

A PCA plot showing the relationship between PC1 (x-axis) and PC2 (y-axis). The x-axis ranges from -4 to 8, and the y-axis ranges from -2 to 2. A yellow star is located at approximately (2.5, 0.5), and a red circle is located at approximately (4.0, 1.5). The data points are colored in a gradient from purple to yellow, indicating a positive correlation between PC1 and PC2.

A PCA plot showing the relationship between PC1 (x-axis) and PC2 (y-axis). The x-axis ranges from -4 to 8, and the y-axis ranges from -2 to 2. The data points are colored by cluster, showing a positive correlation between the two principal components. A yellow star is located at approximately (2.5, 0.5), and a red circle is located at approximately (4.0, 1.5).
