

A scatter plot showing the relationship between DC1 (x-axis) and DC2 (y-axis). The x-axis ranges from -4 to 8, and the y-axis ranges from -4 to 4. Dashed lines are drawn at DC1 = 0 and DC2 = 0. The data points are clustered into several groups, each represented by a different color: blue, green, red, yellow, cyan, and magenta. A yellow star marker is located at approximately (0.8, 0.8). The clusters are distributed across the plot, with some points extending into the negative DC1 region and others into the positive DC2 region.
