

A scatter plot showing the distribution of data points in a 2D space. The x-axis ranges from -4 to 8, and the y-axis ranges from -2 to 2. Data points are colored and sized, with a yellow star marking a specific point near (0, -0.5). The points are clustered around the origin, with a dense group of small, light-colored points in the lower-left quadrant and a more dispersed group of larger, darker points in the upper-right quadrant. The yellow star is located near the origin, slightly below the x-axis.
