

A scatter plot showing a 2D dataset. The x-axis ranges from -4 to 8, and the y-axis ranges from -4 to 4. A yellow star is located at the origin (0, 0). The data points are colored based on their distance from the origin, with a color gradient from purple (farthest) to red (closest). The points form a cloud centered around the origin, with a few outliers further away. A dashed horizontal line is drawn at y=0 and a dashed vertical line is drawn at x=0.
